

FORECLOSURE INTERVENTION ASSISTANCE PROGRAM

Client Contract

The foreclosure intervention assistance program at Flint Neighborhood Improvement and Preservation Project, Inc. (FNIPP) was designed to not only prevent foreclosures but to also to promote the long-term success of the participating homeowner(s). To help achieve that second goal, the program includes a continuing education component.

Participants must complete personal financial management classes and individual counseling sessions. Both are offered at FNIPP and focus on financial goal-setting, budgeting, repaying debt, developing wise spending habits, and saving money. The information presented in the class and the counseling sessions will help participants avoid foreclosure, or any other similar financial disaster in the future.

I understand that this mortgage foreclosure intervention counseling program and that monetary assistance is in no way promised or guaranteed.
